

COLLAPSIBLE LAMP SHADE

Abstract

[0025] A collapsible lamp shade is provided, having removable supports to engage an upper ring and lower ring assembly in an interference fit.

1. A collapsible lamp shade, comprising:
a. an upper ring and lower ring assembly;
b. a plurality of supports, each support having a first end and a second end;
c. the first end of each support being adapted to engage the upper ring and lower ring assembly;
d. the second end of each support being adapted to engage the upper ring and lower ring assembly;
